Subject: Bill C-11

Dear Ministers & Committee members,

I truly hope you take the time to consider your actions and what it means to the general public and not the lobbyists. This bill purely satisfies the corporations and not the public. The totalitarian rule that those corporations would apply to the general public would be detrimental to anyone that uses or works in the digital space legitimately. There are no safe guards that protect anyone except the corporations and the people of Canada will be held hostage by lobbyists and their corporations agendas.

These corporations and organizations should look at their current business model of distribution and evolve to how their consumers would like to use their products. Why is it wrong for their companies to evolve? They would rather spend money lobbying to strangle the public into submission instead of being innovative and create services that would allow the consumer to use their product the way they want to.

You are giving absolute power to organizations that will stifle the digital economy and innovation in Canada. We know what happens when you give absolute power to individuals like this, they become corrupt and will stop anything that is a threat, real or imaginary. Competing legitimate services, artists, creativity, innovation and freedom of speech will be removed almost all together by the greed of the few.

Allowing the few to arbitrarily decide and perform actions like internet blocking, Removal of Fair Dealing Extensions (Satire, Parody, etc.), Removal of Protections for User Generated Content, Extension of the Term of Copyright, The requirement for Internet providers to disclose subscriber information without court oversight based on allegations of infringement, Unlimited Statutory Damage Awards and Content Takedown System with no Court Oversight will severely send Canada into a downward spin in this Digital Age.

I implore you to please think about your actions and what it means to the entire country and our standing in the world as a Digital leader. You could be setting the clock back to the stone ages with your choice.

I believe that these companies need to learn to evolve with the public instead of beating them into submission.

Sincerely, a concerned citizen of Canada

Justin Krinke
