

# My Suggestion for Standing Committee on Finance Pre Budget Consultation

Hello Budget Committee, I have a couple recommendations for the upcoming fiscal year.

I would like to see funding increased for Canada's space program and the Canadian Space Agency. The work that they do is important to the science community and Canadians reap the rewards of their discoveries. When you look at history, you see how having a goal like the moon shot can unite a country.

I would also like to see more funding put towards environmental protection. Forget Doug Ford and his government of know nothings; please put as much money as you can towards helping Canada meet its climate change goals under the Paris Accord and the Kyoto Treaty.

Thank you for your time and consideration.

James McGowan
