

Hello,

I am writing concerning euthanasia in Canada. I believe that strong laws against euthanasia need to be the law of the land in Canada to protect vulnerable Canadians.

First, we need to strengthen palliative and hospice care across Canada. It is ridiculous to suggest that we need to be euthanizing people when they don't have reasonable alternatives in Canada. Once we have established EXCELLENT palliative care, we will know if we still need euthanasia.

We need to protect the rights of dissenting Canadians, especially doctors and nurses, from being forced to perform euthanasia.

Thank you for listening to my concerns.

Lena Schuck
