

To the Justice Dept:

I am respectfully submitting the following points to the Justice Department as a personal submission concerning the legislation on assisted suicide.

I totally disagree that minors are included in Bill C-14; they are just that, MINORS whose thoughts and feelings change dramatically at almost every moment.

Mentally ill persons should not be included because they are just that, MENTALLY ILL and need much support in their illness.

I am **appalled** that the government would even consider compelling a doctor or any other health care professional to intentionally kill a human being. The rights of Doctor's and health care professional are just that **RIGHTS** and nobody should have the right to take their rights away in order to apply the rights of another. This statement includes forcing doctors to refer patients to someone else who would do the killing.

Thank you,

Jennifer Snell
