Patrick Williams, Clerk  
Standing Committee on Health  
Sixth Floor, 131, Queen Street  
Ottawa, Ontario  
K1A 0A6

Dear Mr. Williams,

I am writing to respond to the motion of the Committee on November 22, regarding the shortages of pediatric analgesics.

Specifically, on November 22, 2022, the Standing Committee on Health (HESA) adopted the following motion:

*That for the next six months Health Canada table with the committee every 14 days the number of infant and children's analgesic units that arrived in Canada through exceptional importations that month; and, that this information be provided in both official languages, and the clerk post this information on the committee's website immediately.*

Please find attached the Department's response to the order of the Committee. This is the same report that you received on May 2, 2023, as no additional units were imported during the period of May 3 to May 16. The last report will be provided to the Committee on May 23, 2023.

We are available, as always, to address the Committee's questions and concerns.

Sincerely,

Dr. Stephen Lucas  
Deputy Minister of Health

## **Children’s Analgesics**

As of May 16, 4,402,310 units of children’s pain and fever medications were imported into Canada for hospitals, community pharmacies, and retail outlets. This will continue to supplement the increased domestic production of Canadian supply, which remains at record levels. No additional units were imported during this reporting period from May 3 to May 16.

Products listed below include both acetaminophen and ibuprofen containing products that Health Canada has authorized to be imported to alleviate the shortage.

### **List of products eligible for importation**

<b>Brand name</b>	<b>Strength</b>	<b>Manufacturer</b>	<b>Date of authorization</b>	<b>Country of authorization</b>	<b>Availability</b>
