## 1. Introduction

The quarterly financial report is presented to the Board of Internal Economy in support of an effective oversight of public funds. It compares the year-to-date financial information at the end of each quarter of the current fiscal year (in this case 2018-2019) with the year to date financial information at the end of the same quarter of the previous fiscal year (in this case 2017-2018).

This report has not been subject to an external audit or review.

## 2. Basis of Presentation

This report has been prepared using an expenditure basis of accounting, which is consistent with the Public Accounts of Canada. The authorities include the House of Commons' Main Estimates and other items for that same fiscal year, which have been approved by the Board.

## 3. Corporate Risks

The House Administration's ability to quickly respond to various pressures on its clients and employees, its environment, and its systems and technologies allows it to continue to deliver on initiatives under the Long-Term Vision and Plan (LTVP). The House Administration therefore supports readiness through defined strategies and associated resource allocations to ensure business resilience, as well as the uninterrupted and efficient operations of the House of Commons. Such strategies and allocations enable more effective and efficient communications with Members, their employees and the House Administration employees.

Seeing that the House of Commons is one of Canada's top employers, the House Administration is looking to reinforce the importance of recruiting and retaining qualified and engaged personnel in a highly competitive labour market by focusing its efforts on employee engagement, succession planning and performance management.

## 4. Highlights of Quarterly Results as at December 31

The following graph provides a comparison between authorities approved for use by the Board of Internal Economy and actual expenditures as at December 31 of fiscal years 2018-2019 and 2017-2018.

Graph 1. Comparison Between Approved Authorities and Actual Expenditures

Total authorities have shown a modest increase compared to 2017-2018, and expenditures have increased accordingly. It should be noted that the delay in the move to West Block has resulted in surpluses that have been reallocated to cover costs associated with other initiatives, such as the economic increases for House Administration employees. The House of Commons continuously strives to minimize requests for incremental funding whenever possible, thus promoting an efficient use of resources and avoiding the need to seek approval for additional resources.

### 4.1 Authorities Analysis

## Approved Authorities for the Quarter Ended on December 31

Approved by the Board of Internal Economy by the end of the respective quarter.

Expenditures for 2018-2019 increased by $\$ 18.4 \mathrm{M}(5.6 \%)$ at the end of December compared to the previous fiscal year. The most significant changes to the expenditures by standard object are explained below.

## Salaries and Benefits

Personnel expenditures increased by $\$ 18.2 \mathrm{M}$ by the end of the third quarter of 2018-2019 compared to the previous fiscal year. This increase is mainly due to:

- additional employees hired in support of the LTVP and major investments, such as the Digital Strategy to Modernize the Delivery of Parliamentary Information, the Food Services Modernization and Optimization of Services, the House Officers' expenditure disclosure, the Human Resources Services' pay and benefit services, as well as the creation of the Office of the Deputy Clerk, Administration;
- cost of living increases, including the economic increases to finalize the 10th round of collective bargaining, which cover retroactive payments for the past four years; and
- additional staff hired to support Members in the discharge of their parliamentary functions.

## Transportation and Telecommunications

The increase of $\$ 1.6 \mathrm{M}$ is mostly due to increases of $\$ 1.2 \mathrm{M}$ in travel expenditures and of $\$ 0.4 \mathrm{M}$ in telecommunications expenditures in support of Members carrying out their parliamentary functions. In addition, the increase is the result of differences in the timing of payments from one year to another.

## Rentals and Licences

The decrease of $\$ 1.3 \mathrm{M}$ is mainly due to changes in timing of payments associated with annual software licencing for various network and desktop applications. In 2017-2018, payments were made prior to the end of the third quarter, whereas by the end of that same quarter in 2018-2019, payments had not been made.

## Repairs and Maintenance

The increase of $\$ 1 \mathrm{M}$ is mainly due to the LTVP and investments in facilities.

## Revenues

The increase in revenues of $\$ 1.7 \mathrm{M}$ is mainly due to earlier recoveries compared to the previous year, as well as slightly higher revenues due to in part to activities related to the LTVP.

| Total |  | 522,919 | 348,060 | 66.6 | 511,013 | 329,680 | 64.5 |

As at December 31, 2018, the utilization of authorities remains stable compared to the previous year, only showing a slight increase of $2.1 \%$.
As a result of project delays (e.g. the move to West Block), the House of Commons was able to fund other initiatives internally, such as the costs related to the economic increases to finalize the 10th round of collective bargaining. Therefore, the House did not seek additional external funding and was able to manage within previously approved authorities.
