

Dear Honourable Committee Members;

I am writing to express my concern regarding Bill C14. I ask for a complete prohibition of assisted suicide.

Instead of devising ways to end life we should be spending our time, energy and money on bringing hope to the hopeless, care to the sick and compassion to the aged.

Is assisted suicide now an alternative to suffering? How will this be used and manipulated to bring about untimely death or rid one of a burdensome relative?

Too many questions and I foresee too many costly court interpretations and court interventions surround Bill C-14.

Euthanasia is for pets nearing the end of life expectancy, not parents, children, friends, or the marginalized.

Sincerely

Pam Reid
