

To The Standing Committee on Justice and Human Rights

With regards to Bill C-14 I kindly ask that you will consider fighting for the following amendments to the bill.

**Nurses should not have the same authority as doctors in assisting in suicide.**

**Each case should be required to undergo a judicial review instead of being confirmed only by 2 doctors.**

**Health care workers should not be forced against their conscience to assist in killing their patients.**

**Most importantly the bill should include a definition of the word terminal so that it cannot be stretched and abused.**

Thank you for taking the time to read this email.

Sincerely a concerned Canadian Citizen,

Winston van Staveren
