

I'm writing today because I want a Just Recovery from COVID-19. We are running out of time to solve the climate crisis, and if we lose this fight, nothing else we do will matter. This is a life-and-death problem for our world, and the next few years will be our only chance to save the world for our kids and grandkids.

At this point, with renewable energy becoming cheaper and cheaper, it's a question of preferring one source of energy over another. Unfortunately, the one this government keeps choosing is the one that will cook the planet and leave a dystopian hellscape for my baby and her kids.

The fossil fuel industry is being propped up with public money. It makes me sick with rage when I think about how my taxes are paying for this. Investing in green energy will set us up for the future economy and create millions of jobs in the process. That's how we need to get out of this COVID recession, not by throwing money at a dying industry.

Please, make the recovery from COVID-19 a green and just recovery. You have the fate of the world in your hands.
