

I respectfully require your full consideration to applying the necessary funds to make Palliative Care readily available to those who request it. I realize that some hospitals and Long Term Care Homes do have a Palliative plan. But this is not the case in every institution. I am very disheartened to learn that the Bill on Euthanasia, End of Life Assistance, is being fast tracked. Please apply the same effort to all those who believe in the sanctity of life. Providing the necessary means to those who are dying and who wish to do so with comfort measures should not be a request. It should be a right and not a privilege.

Respectfully submitted,

Mary MacDonald
