

Dear Members of Parliament,

Re: Please stop this harmful Bill C-6 from passing

Using school programs, library programs and different forms of activities to coerce children and young adults to accept a gender different from their biological sex and convert them with hormones and surgery would do irreversible harm for the rest of their lives. It is a terrible, inhumane, dangerous practice and must be banned! (Please read the attached document from BC Children Hospital). The practice is not only harmful; with leniency of the Medical Assistant Dying bill C-7, this kind of manipulation can be fatal. Please read the tragic story of Nancy (Nathan) Verhelst in National Post on Nov 22, 2013. The article is named **"Terminally Transsexual"** because the inhumane conversion therapy put Verhelst in an unbearable psychological suffering which qualified her to be **killed by medical assisted**

dying. <https://nationalpost.com/news/canada/terminally-transsexual-concerns-raised-over-belgian-ethanized-after-botched-sex-change/wcm/95d4358a-710e-4551-a180-84c1ce53acae>

The problem with [Bill C-6](#) is it allows the cruel inhumane conversion therapy to be legal but makes counseling people with unwanted same-sex attraction and gender confusion a criminal offense which can result up to five years of imprisonment. The fact is people with unwanted same-sex attraction and gender confusion have hope. It is real that they can change, not by torturing or any harmful way, but by the love and transforming power of Jesus Christ. Here are the living proofs:

These former gays, lesbians and transgender people ask you not to ban the so-called "Conversion Therapy". Please

watch: <https://www.campaignlifecoalition.com/conversion-therapy>

This man who struggled with unwanted same-sex attraction begs you not to make his story illegal. Please listen to his

plea: <https://www.youtube.com/watch?v=Ec4mZoW1110>

No one can force anyone to do anything against their will. However, people need to hear that there is hope. Would you allow those who want change a chance to know that help is available? Would you allow those who have been through a chance to let others know? Please ban the cruel conversion therapy with intention to convert a person into a man-made artificial gender? Would you let the positive messages of hope spread without a legal consequence?

I am grateful for your kind attention.

Yours truly,
Hing Ka
