

Bill C-6

Dear Member of Parliament

**I oppose Bill C-6 as it is now. What is Conversion Therapy?** I believe all these bans are very broad, **because all of them are unclear on what “conversion therapy really means”?**

Bill C-6 will make it a criminal offence to help a person struggling with their sexual orientation dysphoria! Specific scenarios like a sermon, a casual conversation or a scheduled meeting discussing sex/gender issues would be illegal if the bill passes as is!!

Children & adults should be free to speak to councillors, spiritual leaders or parents to help them with a question of identity, sexuality, & belonging without being investigated or penalized.

I would support banning abusive practices like aversion therapy but nothing else in Bill C-6 as it stands now, however I believe statistics show that a lot of children will revert back to the sex they were born with as they become adults.

I am wondering if conversion therapy bans will become a sub-species of religious conversion bans!!!

Sincerely,

Hazel
