

January 24, 2022

Patrick Williams, Clerk
Standing Committee on Health
Sixth Floor, 131, Queen Street
Ottawa, Ontario
K1A 0A6

Dear Mr. Williams,

I am writing to respond to the motion of the Committee on November 22, regarding the shortages of pediatric analgesics.

Specifically, on November 22, 2022, the Standing Committee on Health (HESA) adopted the following motion:

That for the next six months Health Canada table with the committee every 14 days the number of infant and children's analgesic units that arrived in Canada through exceptional importations that month; and, that this information be provided in both official languages, and the clerk post this information on the committee's website immediately.

Please find attached the Department's response to the order of the Committee. The next report will be provided to the Committee on February 7, 2023.

We are available, as always, to address the Committee's questions and concerns.

Sincerely,

A handwritten signature in blue ink, appearing to read "Stephen Lucas". The signature is stylized and cursive.

Dr. Stephen Lucas
Deputy Minister of Health

Children's Analgesics

As of January 24, 2,338,162 units of children's pain and fever medications were imported into Canada for hospitals, community pharmacies, and retail outlets. This is an additional 434,320 units imported during the period of January 11 and January 24.

This will continue to supplement the increased domestic production of Canadian supply, which remains at record levels.

Products listed below include both acetaminophen and ibuprofen containing products that Health Canada has authorized to be imported to alleviate the shortage.

List of products eligible for importation
